

Victor Olatunji

Fullstack Software Engineer

+2349075789680 victoluolatunji@gmail.com Ile-Ife, Osun State 220101

PROFESSIONAL SUMMARY

Fullstack software engineer with hands-on experience building and shipping production web and mobile applications across the stack — frontend (React, Next.js, TypeScript), backend (Node.js, Express), and mobile (React Native). Currently balancing multiple concurrent engagements spanning contract and product-development work, from a flagship cloud-deployment platform to consumer and business apps in active production. Eager to bring strong fundamentals, adaptability, and a fast learning curve to a product engineering team.

SKILLS

Languages: JavaScript • TypeScript • Go • Python • C# • PHP

Frontend: ReactJS • NextJs • Redux • TailwindCSS • SCSS • HTML • CSS

Backend: Node.js • Express • .NET 6 • FastAPI • Laravel • GraphQL

Databases & ORMs: Prisma • MongoDB • PostgreSQL • Supabase • Drizzle ORM

Payments & Fintech: Stripe • Paystack • Coinbase/Crypto • Solana/Web3 • VTU.ng API

AI Integration: OpenAI • Google Gemini

DevOps & Deployment: Docker • Vercel • Render • Nginx • CI/CD

AI Annotation & Evaluation: AI/ML Data Annotation (Outlier, Handshake AI)

Mobile: React Native • Expo • Flutter

Tools & Design: Git • CMD • Bash • Figma • Design • Communication

EXPERIENCE

AI DATA ANNOTATOR

Outlier, Handshake AI (Remote), April 2026 – Present

- Perform AI/ML data annotation, labeling, and structured review of model outputs across multiple task types.
- Apply technical and coding background to assess response quality, flag inconsistencies, and maintain annotation guidelines.

FULLSTACK DEVELOPER

Adesina, August 2025 – January 2026

- Worked as a fullstack developer across frontend, backend, and mobile — building and maintaining the product end to end.
- Collaborated with design and product to ship and iterate on features in a live, in-production application.

FULLSTACK DEVELOPER

Trex, November 2024 – Present

- Work as a fullstack developer on a team at Trex, contributing across frontend, backend, and mobile.

FULLSTACK DEVELOPER

GreenMart, 2025

- Built and maintained GreenMart across the full stack — a Next.js storefront, a React Native mobile app, and a Node/Express/Prisma API.
- Owned features end to end from web to mobile to backend.

FULLSTACK DEVELOPER (CONTRACT)

Vistapay, October 2023 – December 2025

- Engaged as a contract developer, integrating third-party APIs and building interactive user interfaces with React.js and TailwindCSS.

- Delivered features on a consistent timeline while maintaining code quality and best practices.
- Designed wireframes and iterated on the product based on feedback.

CODE MAINTAINER

BookMolly (formerly Beuvo), 2025 – February 2026

- Maintained the codebase for BookMolly, an appointment scheduling and management platform for businesses, contributing occasional code updates.
- Wrote additional code earlier in 2026 before winding down involvement around February 2026.

FULLSTACK DEVELOPER

Talksign, February 2026 – Present

- Work as a fullstack developer on a team building Talksign, a sign-language translation and learning platform with a translation engine, a learning suite, and a creator studio.
- Build across a React/Vite/TypeScript frontend and a Node.js/MongoDB backend on the company's newest, actively developing product.

EDUCATION

Bachelor of Science (B.S.) in Computer Science and Cybersecurity, Ile-Ife (STEM)

Obafemi Awolowo University

Web Development Skills in STEM (self-directed)

YouTube, Traversy Media — May 2022

PROJECTS

Pxxl

- Cloud deployment & domain-registration platform (an "African Vercel") — built a Go API gateway, a Node gateway service, and dual Next.js/TanStack frontends. Flagship build with thousands of commits across the ecosystem.

Udeme (Contract)

- Civic-tech platform tracking Nigerian public infrastructure spending — Next.js frontend with a JWT-authenticated admin dashboard.

LetsMeet

- Full-stack dating platform for university students — Next.js/Prisma/TypeScript with OTP-verified auth, real-time chat, and matching logic.

SpendWise

- Full-stack finance tracker (Express/MongoDB + React) with an OpenAI-powered chat assistant for spending insights.
